Website

UI/UX Designer with a background in hospitality, teaching and Geology. Skilled in solving problems with an empathetic mindset and bringing projects from concept to final product independently and with attention to detail.

UI/UX Projects

Portfolio Website | May 2024

- Built a responsive portfolio website from scratch, writing clean and well-organised code in HTML, CSS & Java.
- Used problem-solving skills to identify and fix bugs in the website, enhancing user-experience and functionality.

Thrive | Budgeting App | April 2024

- Conceptualised and built a prototype budgeting app that incentivises users who don't like working with finances.
- Created a responsive design for mobile & desktop breakpoints.
- Users are rewarded in the app by growing their own 'Money Trees'.

ShuttleShare | Badminton App | Jan - Feb 2024

- Created a social badminton app, designed to meet both iOS and Android mobile guidelines.
- Produced two prototypes with complex animations.
- Users are able to record matches they have played so they can track and compare stats with other users.

Professional Experience

Small Goods | Supervisor | Sep 2022 - Sep 2024

- Managed a team of 4, utilising communication skills and teamwork.
- Ensured sustained client satisfaction through organisation, time management and empathy.

200 Degrees | Head Barista | Apr 2021 - Aug 2022

- Trained team-members with zero experience, supporting them to achieve consistently high standards with attention to detail.

Apax English | ESL Teacher | Nov 2019 - Apr 2021

- Taught English in Vietnam to students in-person & online, adapting lessons based on their individual requirements.
- Managed 10 different classes independently, employing excellent listening skills, multitasking and creativity.
- Used problem solving and adaptability skills to meet students needs in a challenging environment during the COVID pandemic.
